

KUNAPANENI NIRANJAN

Computer Science Engineering Student | AI/ML | Software Engineering | Cloud

Hyderabad, Telangana, India | +91 9440713401 | kunapaneni.niranjana@gmail.com

 github.com/NIRANJAN-KUNAPANENI |  Portfolio

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience building AI agents, LLM-powered automation workflows, full-stack applications, and self-managed cloud infrastructure. Experienced with Python, JavaScript, Node.js, n8n, LangChain, React, MongoDB, Linux, Docker, Git, and DigitalOcean. Interested in AI/ML, software engineering, cloud/DevOps and cybersecurity.

EDUCATION

Bachelor.Tech in Computer Science & Engineering

2023 – 2027

DRK College of Science and Technology, JNTUH

CGPA: 7.0

TECHNICAL SKILLS

Languages	Python, C, JavaScript, Node.js
AI / ML	Artificial Intelligence, Machine Learning, LLMs, Gemini API, LangChain, Ollama, Prompt Engineering, LLM Evaluation
Automation	n8n, Agentic Workflows, API Integration, Structured Data Extraction
Web / Full-Stack	React.js, Express.js, REST APIs, HTML5, CSS3
Cloud / DevOps	DigitalOcean VPS, Ubuntu, Linux, Docker, PM2, Caddy, SSH, Git, GitHub
Systems / Security	Linux, Kali Linux, Cybersecurity Fundamentals
Databases	MongoDB, Supabase
Core CS	Data Structures & Algorithms, Object-Oriented Programming, Computer Networks

EXPERIENCE

AI Automation Developer

2024 – Present

Freelance

- Designed and deployed **OpenClaw**, an AI agent handling **28,500+ automated requests/day** on a self-managed Ubuntu VPS.
- Developed agentic automation pipelines for content generation, data classification, and structured-output extraction using n8n and LLM APIs.
- Engineered a **19-key rotating Gemini API pool** through self-hosted n8n to eliminate recurring API costs within the automation workflow.

PROJECTS

OpenClaw – AI Agent Orchestration Platform

n8n, Gemini API, DigitalOcean, Ubuntu

- Built and deployed an AI agent supporting real-time task requests through Telegram with **99%+ reported uptime** on self-managed cloud infrastructure.

LOOT PULSE – Autonomous Affiliate Content Pipeline

n8n, Gemini API, Amazon Associates

- Developed an automated pipeline for deal discovery, AI-assisted content generation, and continuous distribution across Telegram and Instagram.

RoadAssist – Full-Stack Roadside Assistance Platform

React, Node.js, MongoDB, Python

- Developed a full-stack roadside assistance platform with real-time service matching, geolocation tracking, and ML-based ETA prediction.
